EVENING BULLETIN

3:30 EDITION

Is a Power and Influence Locally

Attractive advertising copy, run regularly, week in and week out, year in and year out, will do the trick for you, Mr. Merchant.

ESTABLISHED 1882. No. 5049.

12 PAGES.—HONOLULU, TERRITORY OF HAWAII, THURSDAY, OCTOBER 5, 1911.—12 PAGES.

PRICE 5 CENTS.

TURKISH FORTS HOLDING OUT DESPERATELY BELT-ROAD CRITICS ANSWERED

STARRETT FINDS SETTLER READY TO COME

Hawaii can get all the white settlers the Territory can supply with homesteads, and more.

So declares S. T. Starrett, the farming expert brought here by the Territory to encourage the small producer and develop the central marketing system.

Mr. Starrett has been in California since his trip here earlier in the year and he says that scores of men with from a thousand to four or five thousand dollars to invest are anxious to come to Hawaii and make their homes here.

"Not less than ten such men spoke to me before I came over and declared themselves ready to come and bring their families if we could give them any assurance of getting land here on which they could start farming," says Mr. Starrett.

"They would make very desirable (Continued on Page 4.)"

THIRD PARTY TO "SEE HONOLULU" TOMORROW

The third in the series of "Seeing Honolulu" automobile trips, planned by the Board of Health to allow businessmen a rapid but thorough inspection of the most pressing sanitary needs of the city, is to take place tomorrow afternoon.

The president of the Merchants' Association, E. O. White, those of the directors who are in the city, and several members of the various committees will be taken on the trip. The party leaves the corner of Fort and King streets at 3:30 o'clock.

\$100,000 JOB TO BE BID ON

Within two months bids will be asked for on the paving, sewerage and installation of the water supply at Pearl Harbor. This announcement was made this morning.

The Pearl Harbor contracts will aggregate in the neighborhood of \$100,000 and it is expected that in addition to the well known local contracting and paving concerns, tenders will be received from the Coast. It is anticipated that several firms from the mainland will figure on the job.

The field is to be open to all, and while it is conceded that local men have a better grasp on the situation, it is quite possible that an outside man will get the job.

GENERAL AND STAFF IN FIELD

Mounted, and fully equipped for the field, Brigadier-General Macomb, accompanied by Captain Carter, chief of staff, and Lieutenant Andrews, his aide, left department headquarters at 9 o'clock this morning to intercept the First Field Artillery on its practice march. Three batteries are now on the road, and the division commander will meet and inspect them at some point on the march.

The artillery expects to reach Fort Shafter tomorrow, and will probably march through the city some time during the day.

General Macomb's frequent inspection of troops in the field is in line with the policy developed by the War Department some months ago of relieving (Continued on Page 2)

\$250,000 ONLY FOR COMPLETE BELT ROAD WORK

ENGINEER'S ESTIMATE FOR
HEEIA BEACH BELT-ROAD WORK.

Plant cost	\$ 5,000
Excavation of 51,544 cubic yards material at 25 cents	12,886
Excavation from borrow pits	2,902
Surfacing and ditching 7935 lineal feet	397
Crowning 2600 feet graded roadway	250
Temporary roads and bridges	9,488
Nine concrete culverts	2,074
Laying concrete drain pipes	5,780
Building rip-rap and retaining walls	200
Building approaches to new road at intersections	600
Fencing	200
Macadam for 46,350 square yards at 67 cents a yard	31,055
A total estimate of	\$70,892

HEALTH FIGHT GATHERS FORCE; GOVERNOR HAS TAKEN IT UP

Territorial officials have taken up the fight to prevent a modification of the Federal quarantine regulation that will open this port to yellow fever danger. This morning the Governor started a conference with Secretary Mott-Smith and went into the matter thoroughly. They will take it up again this afternoon and devise some scheme of campaign that will be effective.

The Governor stated at noon today that he had so far not sent any cable in his personal capacity as he wanted to discuss the whole situation with the various officials interested directly in it before he took such a course.

The matter is to come up at the meeting of the board of health this afternoon when President Pratt will make a strong report in favor of a strenuous fight being maintained all along the line and without any let up until the health of Honolulu has been safeguarded beyond any question. The members are believed to all be of the same mind as the president and the surgeon general will be in for a hot time before he is through with the matter.

President Pratt will stick by his decision he arrived at some little time ago when the matter first came up, namely that it is not safe for any vessel coming from any of the South American ports to be allowed free run of the harbor without proper precautions at both ends of the route.

There is also another danger that opens itself up if vessels are allowed to come in without any restrictions and that is the matter of the malarial fever mosquito getting a hold here.

Honolulu is peculiarly situated in regard to both malarial and yellow fever. The mosquito that will carry the latter disease is here but there is so far no disease. With malaria the disease is here but there are no mosquitoes to carry it. This is another phase of the question that has long been recognized but which now (Continued on Page 2)

PLANTATION LABOR OUTLOOK BRIGHTER; FILIPINOS COMING

The outlook for plantation labor in the Territory is brighter now than it has been for a year. Together with cheering advices from A. J. Campbell, the Territorial recruiting agent in Europe, comes news from the Philippines that considerable more labor is being secured there.

Plantation managers welcome the news, for the shortage has been serious enough to make a good deal of difference in plans for next year. With a bumper crop coming, one that should break even the record that is being set this year, the labor shortage caused some concern.

Affairs have progressed so well with Agent Campbell that the Board of Immigration is now negotiating for another steamer to follow the Wilkeson. The Wilkeson is expected to leave Europe for Honolulu, by way of the Horn, on Monday or Tuesday next, perhaps as early as Sunday. If the board can arrange charter rates successfully, the second steamer will be chartered and announced very shortly.

Eighty Filipinos are coming by the Pacific Mail liner Mongolia on the next trip here for the labor bureau of the Planters' Association. This is the first shipment of any importance in some time, and it is expected that from now on there will be many more of the Filipinos coming. While the shipments are comparatively small, the outlook is steadily brightening.

A suit has been filed in the Circuit Court by Father H. C. Valentin and the Hawaiian Trust Company against M. K. Ena. It is in connection with some land belonging to the Ena estate and which the plaintiffs want to sell but which the defendant has to give her consent to. The plaintiffs are asking the court to have her appear and say why she will not do what they want.

Turks Not Ready To Quit

(Associated Press Cable.)
TRIPOLI, Tr., Oct. 5.—No surrender has been offered here by the Turkish garrison, according to today's reports. The Italian cruiser Garibaldi has entered the harbor and is advancing to shell the forts.

The Turkish torpedo boats have been stranded and badly damaged, and, with the protection of the warships, the Italian forces have effected a landing near the city.

U. S. SCOUT CRUISER CLOSE TO WAR ZONE

(Special Bulletin Cable.)
MALTA, Med. Sea, Oct. 5.—The U. S. scout cruiser Chester, sent by the United States on account of the war situation, arrived here today.

TURKISH FLEET IN BOSPHORUS

CONSTANTINOPLE, Turkey, Oct. 5.—The Turkish fleet has entered the straits of Bosphorus.

REPORT ITALIANS BLOWN UP

LONDON, Eng., Oct. 5.—According to a report received here today from Constantinople, an Italian battleship has been sunk by a mine in the harbor of Tripoli. The report is doubted.

FIRST WIRELESS FLASHES ACROSS WHOLE PACIFIC

(Special Bulletin Cable.)
SAN FRANCISCO, Cal., Oct. 5.—The first wireless message has been sent entirely across the Pacific. A message from the Jai station, Otchishu, Japan, sent out for the Chiyo Maru, was received here and replied to.

TWO HURT IN STRIKERS' RIOT

(Associated Press Cable.)
NEW ORLEANS, La., Oct. 5.—A train of strikebreakers, reaching here, was mobbed by the rioters and two seriously injured. The police dispersed the strikers. An injunction has been issued against interference.

TAFT SPEAKS IN MORMON CHURCH

(Associated Press Cable.)
SALT LAKE CITY, Utah, Oct. 5.—President Taft today addressed a great crowd in the Mormon tabernacle here.

MILITARY ESCORT FOR LATE ADMIRAL SCHLEY

(Special Bulletin Cable.)
WASHINGTON, D. C., Oct. 5.—Rear-Admiral Winfield Scott Schley was buried today. The body was escorted by naval cadets, soldiers and sailors. The pall-bearers were General Nelson A. Miles and Admirals Remy, McLean, Barkley, Cronwell, Green and Nicholson.

WORLD-FAMOUS VOLCANO PLAN IS LAUNCHED

With an eruption of enthusiasm that would have done credit to Kilian Hschi, the project for founding a permanent observatory at the crater, and for establishing a local association for volcanic research, was launched today. Twenty-three most prominent in business and scientific circles gathered at a luncheon given at the University Club, at which the importance to Hawaii of the exploitation of its volcano's was thoroughly gone into by several speakers.

As the result of the meeting, a committee of five will be appointed to draught plans for a non-incorporated association, destined to raise locally a portion of the money needed to maintain permanent observers at the volcano, and to make Hawaii the most important spot on the map for volcanologists.

Governor Frear was an intensely interested guest today.

"I believe," said the Governor, "that the establishment of a permanent observatory is of intense economic as well as scientific importance to the world. By continuous observations it may be possible to predict volcanic and seismic disturbances all over the globe, with consequent saving of life and property. Then again the advantage to Hawaii from a publicity standpoint is considerable. If a national park is made at Kilauwea and if scientists come here from all parts to study the volcano, it will not be long before Hawaii is known to have the most interesting 'hame' volcano in the world."

The object of the meeting was concisely outlined by L. A. Thurston, who went into the back history of the observatory proposal.

Another speaker was Prof. J. W. Gilmore, president of the College of Hawaii.

"When one goes to the volcano he stubs his toe on endless question marks," said Prof. Gilmore. "There is much to be learned and it is of the utmost importance to science and to this community that the observations now being carried on by Mr. Perret should go on, and that the records should be continuous."

The following guests were present: Governor Frear, A. F. Judd, J. M. Dowsett, S. M. Hanson, J. A. Kennedy, Clarence Cooke, J. W. Gilmore, R. S. Hosmer, Judge Henry E. Cooper, C. M. Cooke, R. W. Shingle, Rev. W. D. Westervelt, R. F. Dillingham, L. A. Thurston, W. H. Hoogs, A. Gartley, Prof. W. A. Bryan, E. I. Spalding, H. von Damm, L. Redington, H. R. Jordan.

Mr. Thurston outlined the plans as follows:

The suggested organization is based upon the following state of facts:

Hawaii possesses the two greatest active volcanoes in the world, Kilauwea and Mokuawewe, the former most accessible, and the easiest and safest to observe of any volcano, large or small.

Much has been written about Hawaiian volcanoes, more particularly by Dana, Brigham and Hitchcock, all of whom have made studies of the subject, extending over many years. Their personal observations were, however, at wide intervals and covered brief periods; while the observations of others have been, as a rule, fragmentary or disconnected, and frequently unreliable through unfamiliarity with the subject, even though made by reliable persons.

In fact, there has been no continuous observance of conditions and phenomena at Kilauwea and Mokuawewe.

Professor Jagger's Work.

Under the foregoing conditions, Thomas A. Jagger, professor of geology in the Massachusetts Institute of Technology, visited Hawaii in 1909. Professor Jagger has made a special study of earthquakes and their relationship to volcanic activity.

(Continued on Page 4.)

PINEAPPLES AND BANANAS MAY BE BARRED

Hawaii shippers of pineapples and bananas must revolutionize their methods of packing the fruits, or California will put an embargo on them as rigid as that declared on papayas and alligator pears. In other words, bananas and pineapples will be shut out of California and the fresh pineapple industry will be given the hardest blow it has ever received.

E. K. Carnes, the expert entomologist sent here by the State of California to investigate the ravages of the Mediterranean fruit fly, has gone back to the Coast without making any public announcement as to what his recommendations will be. He declined to state what steps should be taken to protect California as California feels that State should be protected.

From other sources, however, the Bulletin has learned on unquestionable authority that Carnes made the statement that unless a change takes place here in the methods of packing and handling pineapples and bananas, these fruits must be shut out of California.

While encouraging every move here and in California to cooperate in a campaign against the fruit fly, Mr. Carnes will recommend, it may be stated, that methods here must be changed extensively. The changes, in fact, may involve a central packing and inspection station, where the inspection may be done either by the government or by some system established by local shippers or producers.

Mr. Carnes, it is understood, believes that bananas may be safely packed in rice straw and pineapples (Continued on Page 4)

LORD-YOUNG TO BUILD COLLEGE

With a bid of \$65,700, twenty-five dollars lower than the next bidder only, the Lord-Young Engineering Company gets the contract for building the new College of Hawaii building.

The bids were opened last Saturday and taken under advisement by the board of regents of the college. Today Judge H. E. Cooper, chairman of the board, announced the decision. Work will start at once and will be finished within eight months.

MUCH WORK NEEDED TO FIX UP HEALTH LAWS

The health laws passed by the last Legislature are not finished with yet. For some time past Secretary Mott-Smith has been putting in many an anxious hour on them straightening them out and seeing that they are all ready for sending along to the printer.

Now they have gone over to the Attorney General to keep him busy for some time and this morning he was very anxiously looking over them. He will go through them from the legal aspect and see that nothing wrong has crept in while he will also index them up so that the layman can refer to the section he wants without having to wade through the whole long list.

COST OF LIVING DEBATE PUNCTUATED BY SHOTS

(Special Bulletin Cable.)
VIENNA, Aust., Oct. 5.—Four shots were fired at the ministerial bench today during a debate on the high cost of living in the Reichsrath. The shooter missed and was immediately arrested.

SUGAR

SAN FRANCISCO, Cal., Oct. 5.—Beets: 88 analysis, 158. 1d.; parity, 5.87c. Previous quotation, 17s. 7d.

Weekly Bulletin 61 per year.
